

HER Number	Site Name	Record Type
01027	Ringwork and Bailey Castle 390m W of Buntingsdale Hall	Monument

Scheduled Monument: A well preserved ringwork (a type of medieval stronghold defended by a bank and ditch which is relatively uncommon in Shropshire), which is particularly unusual in that its bailey (outer court) survives.

Monument Types and Dates

RINGWORK AND BAILEY (Medieval - 1066 AD to 1540 AD)

Evidence EARTHWORK

Description and Sources

Description

An earthwork revealed by tree felling, in Castlehill Wood. It was noticed in 1950 by Mr P Bentley. Opposite Buntingsdale Hall, it is a well fortified site rising out of the alluvial flat, consisting of a sandstone ridge defended by the river Tern and associated marsh on the E, SE and S sides, and on the North by a rampart with a wide external ditch. The hill top is flat, of diameter 70ft, rising 18-20ft from the ditch. A small rampart runs along the W side from the SE.
ADS IAM for DOE FI 1970 <1>

Large Norman ringwork, situated at SJ65103252, incorporates, and is modelled from the upper parts of a glacial morainic mound of sandy soil and small stones. The mound sits atop steep slopes falling to a stream on the E and S but joins gently rising ground to the NW. The base diameter is about 65m and the height to the interior about 3m from the outside ground level on the W. The D shaped interior is 35m in diameter and is enclosed by a rampart, 14m to 17m in width and up to 2m in height. There is a 4m wide entrance in the S side. The NE side has been carried away by a landslip..An outer ditch, 14m in width and 1.2m in depth provides an additional defence on the weak NW side. OS FI 1975 <2>

Evaluated for MPP in 1990-1, High score as one of 43 Motte castles. <6>

Scheduling revised 2001. Scheduling description: ->

-> The monument includes the earthwork and buried remains of a ringwork and bailey castle occupying an elevated position on a spur of land next to the steep north west valley side of the River Tern. From this commanding location there are extensive views of the land to the west and the Tern valley. ->

-> The ringwork is D-shaped, measuring approximately 30m by 34m internally, and is defined by two ramparts, which are separated by an entrance passage 6m wide to the west. The ringwork is defined on its north eastern side by the bluff created by the adjacent river. The rampart on the southern/south western side is considerably smaller than the one to the north west. It is about 8m wide and stands just less than 1m high, becoming slightly broader and higher at its eastern end. Its defensive strength is significantly enhanced by its position at the top of a steep slope, which has been deliberately accentuated. Down the slope to the south east of this rampart, earth has been deposited to form a level projecting lookout platform, measuring approximately 11m by 16m. The rampart defining the north western side of the ringwork is about 18m wide and stands to a height of 2.5m. It is bounded on its northern side by a broad ditch, up to 19m wide, which becomes narrower towards its southern end where it defines the northern side of the entranceway into the interior. To compensate for natural slope within the ringwork the eastern part of the interior has been raised in order to create a level building platform. ->

-> On the slight ridge to the north west of the ringwork, a bailey was constructed. Within this enclosure a range of ancillary structures are likely to have been built, including stores, stables and additional domestic accommodation. The north eastern side of the bailey, which is about 45m long, is marked by the bluff formed by the river, which has been partially steepened to increase its defensiveness. The defences constructed to define the north western and south western sides of the bailey are no longer visible at ground level, but will survive as buried features. ->

-> All fence and gate posts, and stiles are excluded from the scheduling, although the ground beneath them is included <7>

A programme of total station theodolite (TST) analytical earthwork survey was undertaken by a number of volunteers at the ringwork and Bailey Castle (Castlehill) at Fordhall Farm (PRN 01027) under the direction of James Goodhind. The survey achieved fairly comprehensive coverage across the earthworks of the site and allowed the creation of a series of 2D and 3D models. <8>

Photographed during aerial survey in 2009. <9>

Little survives of the presumed bailey to the north of the ringwork. The site as a whole was only re-discovered after the Second World War when it was cleared of woodland. It is described as having no known name or documentary reference, and even its history of tenure is unclear from the start. An amateur, unpublished, excavation at the site in the 1950s did

uncover dressed stone [the source of this information appears to be pers. comm. - see <11>]. <10>

This site was 'excavated' by a teacher at Market Drayton in the 1950s. No details are known of this individual or whether any record still exists. The late tenant gave information on the excavations - some sort of cobbled surface was discovered, along with stone fragments that may have been door jambs and lintels. In addition, a lot of worked sandstone is built into earlier sections of the present Fordhall Farmhouse and laid into its rockery. <11>

01029	Roman Road (the Longford) from Stretton (Staffs) to Whitchurch	Monument

The Roman Road from Stretton in Staffordshire towards Chester, via Whitchurch.

Monument Types and Dates

ROAD (Roman - 43 AD to 410 AD)

Evidence	CONJECTURAL EVIDENCE
Evidence	DOCUMENTARY EVIDENCE

Description and Sources

Description

Roman road running from Stretton (Staffs) to Whitchurch. Evidently constructed in order to cut off the unnecessary mileage in reaching Chester from Stretton by way of Wroxeter. In 1994 it was suggested at a public enquiry into a road improvement scheme at the Longford, Rosehill, that the line of the former parish boundary marks the line of the Roman Road at this point rather than the line of the current road, the A41 <3>

Evaluated for MPP in 1990-1, High score as one of 11 Roman Roads <4>

This Roman road is known as "The Longford". It was a branch from Watling Street, the main London to Wroxeter (Viroconium) road, and ran from the site of a Roman settlement at Water Eaton (Staffs) on Watling Street to Chester (Deva) via Whitchurch (Mediolanum) <5>

A trial trench located the cutting for the road at Ellerton, though no road surfaces were observed. <6>

A programme of archaeological evaluation was carried out in 1996 on land at Hinstock. Two trial trenches were excavated. The only archaeological features recorded related to a holloway running NW-SE across the site. This hollow way was interpreted as marking the line of the Roman road running through this area. A programme of survey of this feature and a watching brief across the remainder of the site was recommended. <7>

Following on from the evaluation, a programme of survey was carried out of the holloway, interpreted as representing the line of the Roman road as it crossed the site. A watching brief was subsequently carried out during the initial groundworks on site; this recorded no archaeological finds or features. <8>

Article investigating evidence of the Roman road between Pennocrucium (Water Eaton) and Mediolanum (Whitchurch) and the role it played in the early conquest. <9>

MOATED SITE (Medieval - 1066 AD to 1540 AD)	Evidence	EARTHWORK
OPEN FIELD (Medieval - 1066 AD to 1540 AD)	Evidence	EARTHWORK

Description and Sources

Description

Sited on very gently sloping land on the S side of a gentle E/W ridge c200 m to the N. Well preserved rectangular moated site. The moat arms average c10m in width and c2m deep to the present partly waterfilled/ waterlogged level. The wet moat is used as an outlet for domestic water and drainage from the farm to the NE. This flows in at the NE corner where the SE arm has been extended northwards for the inlet... The island, which is inaccessible, measures roughly 43m x 40m, no apparent internal features can be seen on the platform. Well preserved ridge and furrow lies in the pasture field on the immediate NE side of the moat. It is orientated NE/SW (the same as the moat) with a well preserved headland along its S edge. Two pond/depressions lie on the E side of the field and appear to cut through the ridge and furrow. Sited in and surrounded by woodland except immediately to the NE, where there is a pasture field. M Watson FI 1981 <4>

Evaluated for MPP in 1990-1: Medium score as one of 133 Moated sites; Medium score as one of 91 Irregular Open Field Systems <7>

Scheduling affirmed in 1999. Scheduling description: ->

-> The monument includes the earthwork and buried remains of a medieval moated site situated in an area of gently undulating land. The moat defines an island, which measures approximately 40m north west -south east and 45m south west-north east. Material excavated from the moat has been used to raise the surface of the island by about 0.3m above the surrounding ground. The moat retains water, and the arms of the moat are between 13m and 18m wide and have an average depth on their outer sides of 1.3m. The northern part of the south eastern arm has been extended by 10m. ->

-> The remains of a strip cultivation system (ridge and furrow) survive 40m to the north east of the moated site, but these are not included in the scheduling. ->

-> A number of features are excluded from the scheduling, these are; all modern field boundaries, fences and gates and the drain inlets and the associated control mechanism at the north eastern corner of the site; the ground beneath all these features is, however, included <8>

Photographed during aerial survey in 2007 and 2009. <9><10>

MOATED SITE (Medieval - 1066 AD to 1540 AD)

Evidence EARTHWORK

Description and Sources

Description

Moated site situated on ground gently sloping E towards R Duckow which lies c45m to the E. It is sited c2-3 m above the water level. This formerly well preserved rectangular moat is now highly degraded due to ploughing, and is only just discernible. The island, which measures c45m x60m is raised and levelled to compensate for the general slope of the ground, but at present is only 0.25m above the surrounding ground level. It has no trace of any buildings. The ditch whose E half was formerly waterfilled is c 5m wide and 0.3m deep. There is no trace of a causeway. An outer retaining bank runs around the E half of the moat, this too was formerly a substantial feature, but is now very low and degraded. M Watson FI 1981 <4>

Evaluated for MPP in 1990-1, Low score as one of 133 Moated sites. <6>

Vague cropmark visible on vertical aerial photography. <7>

Also known as 'Warandashale'; received a license to crenellate in 1295. <8>

The site is not mentioned as being fortified at any time after 1295, so there is the possibility that the license to crenellate never led to a fortification being built although the moat (c.45m x 60m) is one of the larger moated sites among a cluster around Moreton Say which would suggest that it carried some status. <9>

Description and Sources

Description

To the south east of Middle Morrey is a broad square moat <1a>
Moated grange <1b>

Well preserved square moat, still waterfilled. The raised island has traces of ridge and furrow, which also surrounds the site. An overflow leet runs from the SW corner. Some modern mutilation along the SW arm . M Watson FI 1981 <3>

Evaluated for MPP in 1990-1: Medium score as one of 133 Moated sites; Medium score as one of 91 Irregular Open Field Systems <5>

Scheduling revised in 1999. Scheduling description: ->

-> The monument includes the earthwork and buried remains of a medieval moated site and an adjacent field system situated in an area of gently undulating land with good views of the surrounding countryside. The water-filled moat defines a square island 40m across. Access onto the island is via a modern bridge across the north western moat arm. The arms of the moat have an average width of 14m and are all at least 1m deep, and there is a 15m extension to the western part of the south western arm. A later drainage ditch has been cut from the south western corner of the moat. The remains of a strip cultivation system (ridge and furrow) surround the moat on its northern, eastern and western sides. A 20m wide sample area of this cultivation system is included in the scheduling in order to preserve its relationship with the moat. A number of features are excluded from the scheduling, these are; the modern field boundaries, gates and fences, the modern bridge over the north western moat arm and the surface of the track that runs past the site; the ground beneath all these features is, however, included. <6>

Photographed during aerial survey in 2007 and 2009. <7><8>

01666	Ternhill Bridge	Monument

This site represents: a bridge of medieval date.

Monument Types and Dates

BRIDGE (Medieval - 1066 AD to 1540 AD)

Evidence DOCUMENTARY EVIDENCE

Description and Sources

Description

Ternhill Bridge, carrying the road from Newport to Whitchurch, was evidently of some importance as a grant of portage for its maintenance was made in July 1319 and extended in June 1322 for a further three years. In these grants, the place is called Longeford . Another grant is referred to in 1331 <1a>

A modern concrete structure carries the road to the E of the site of the previous bridge, of which no trace remains. OS FI 1975 <1>

COUNTRY HOUSE (Demolished 1957, 17th century to 20th century (post-war) - 1600 AD to 1957 AD)

Evidence DOCUMENTARY EVIDENCE

Description and Sources

Description

Destroyed. Only footings at ground level mark the site of the site of the Hall. OS FI 1962 <1>

On the site of a late C15th house. Rebuilt 1685, altered in 1822 and again enlarged in 1885 by Norman Shaw. Built of red brick with blue headers; stone plinth, band and moulded cornice. Roughly E shape in plan, courtyard to the west having a dormered 3rd storey. Façade with 17 sash windows to east with raised centre attic and end storeys. Only relic of Tudor house was some linenfold panelling in one of the rooms, rest of the interior being mainly C18 including fine staircase. Originally the entrance was on east façade but drive diverted and small stone bridges built across the ornamental lake when park was landscaped in early C19. Present porch towards courtyard flanked by round windows probably the work of Norman Shaw. <2>

Leach gives a photograph of the exterior.<5>

The mansion was pulled down in 1959. Built for the 6th Viscount Kilmorey and dated 1685, it was perhaps the grandest, certainly the largest, house of its date in Shropshire. Norman Shaw, who thought it 'dignified but dull', remodelled the interior in 1886-6 for A P Heywood-Lonsdale.<8>

In his study of the Shavington's history, Henry D. Harrod traced the documentary record of 'a house' at Shavington to 1293-41. Although there must have been a house of some standing at Shavington in 1438 when Sir John Needham first leased it, it was to be fifty or so years before the first dwelling 'of considerable size' was built here. The substantial house built by Sir Robert Needham at the end of the 15th Century was all but abandoned at the outset of the Civil War, remaining disused for forty years. The state of the place was such that when he came of age in 1678 Thomas Needham, 6th Viscount Kilmorey (1658-1687), opted to build anew. The new pile of this the wealthiest of Kilmoreys was to be the largest country house built in Shropshire. It was completed in 1685. Although Shavington Hall was pulled down in 1959, there does survive a handsome documentary record of its layout and appearance in the form of drawings and photographs. <9>

03690	Castle Hill, Bletchley	Monument

Hollow way of a former track of probable medieval date. Has been suggested as a ditch, possibly related to a castle site of probable medieval date - no further evidence found for this interpretation.

Monument Types and Dates

CASTLE? (Medieval - 1066 AD? to 1540 AD?)	Evidence	EARTHWORK
HOLLOW WAY? (Medieval - 1066 AD to 1540 AD)	Evidence	EARTHWORK
TRACKWAY (Medieval - 1066 AD to 1540 AD)	Evidence	EARTHWORK

Description and Sources

Description

The field immediately to the W of Bletchley Manor was recorded as Castle Hill on the 1840 Tithe Award Map. It is a natural hill overlooking the Bailey Brook to the W, and appears to have been roughly circular before the N half of the top of the hill was cut away by the realignment of the A41. It does, however, appear to have been artificially modified and altered, particularly on its S side, where a natural gully running from the valley bottom up the side of the hill has been continued and widened so as to form an artificial ditch cutting off the top of the hill from the adjacent ground to the S and E. This ditch is up to c 1m deep and 4m wide, but both narrows and shallows at its E end where it curves round with only a slight inner scarp surviving. This ditch may have served as a defensive feature for the hilltop, whose natural slopes would have proved sufficient on its W side. All trace of it to the N has gone due to the new road cutting. It may represent the remnants of a former earthwork castle site, perhaps the predecessor of adjacent Bletchley Manor. However, the surviving portion of the hilltop does not show any further traces of fortification or habitation, and the line of the ditch is shown as a trackway on the TA map. It could therefore simply be the holloway of a former track. M Watson Fl. 1983 <1>

Evaluated for MPP in 1990-1, Medium score as one of 15 Medieval Trackways. <3>

03694	Round Barrow 330m S of Oldfields	Monument

Scheduled Monument: An unusual survival of a Bronze Age burial mound in an arable landscape (where barrows seldom survive centuries of ploughing).

Monument Types and Dates

ROUND BARROW (Bronze Age - 2600 BC to 700 BC)

Evidence EARTHWORK

MOTTE? (Medieval - 1066 AD to 1540 AD)

Evidence EARTHWORK

Description and Sources

Description

No descriptive text <5>

Scheduled as a round barrow in 2001. Scheduling description: ->

-> The monument includes the earthwork and buried remains of a Bronze Age round barrow situated on a gradual south facing slope in an area of gently undulating land. The barrow mound is constructed of earth and is roughly circular, measuring approximately 18m in diameter at its base. It has a flat top, measuring 7m by 9m, which may be the result of later modification. In relation to the sloping ground on which it stands, its height increases from 1.6m to 2m. Although no longer visible at ground level, a ditch from which material was quarried during the construction of the barrow surrounds the mound. This has become infilled over the years but will survive as a buried feature, approximately 3m wide. Immediately to the south of the mound is a crescent-shaped pit, of probable modern date, which cuts the base of the mound and part of the surrounding ditch <6>

Photographed during aerial survey in 2009. <7>

Evaluated for MPP in 1990-1, Low score as one of 43 Motte castles. <8>

07602	The Park around Shavington Hall	Monument

A park surrounded the predecessor of Shavington Hall (PRN 01674) by 1577. By 1752 the grounds were extensive. Major changes were made in the late 18th or early 19th century. In the mid 19th century a brick wall was built around most of its perimeter. A walled kitchen garden, possibly of 18th century date, survived the demolition of the house in 1959.

Evidence DOCUMENTARY EVIDENCE

Description and Sources

Description

Shavington Hall, built for the sixth Viscount Kilmorey in 1685, was described by Pevsner as the grandest house of its date in Shropshire. It was altered in 1822, again by Norman Shaw, and finally in 1903 by Sir Ernest Newton (N. Pevsner, Shropshire (1958), 240-1). In 1959 it was demolished, and in 1994 its site lay under rough grassland. North west of the Hall lay a stables block of 1787-8 (Listed Grade II: 1573/6/6) and behind that a walled kitchen garden of c. 125 x 80 m; both escaped demolition in 1958 and still stood in 1994. ->

-> Sections at least of the walls of the 'walled kitchen garden, not examined in detail in 1994 when it was in commercial horticultural use, appeared to be of 18thC or earlier date. ->

-> Along the south front of the Hall, which was probably remodelled in 1885 and 1904 (dates on rainwater heads noted on photos in Local Studies Library) was a low terrace giving access down onto a formal lawn with central sun dial. A 20C air photo (Cambridge, St. Joseph 1108/65) shows this to have at some stage to have been divided up with elaborate geometric beds. In 1994 the area of this garden remained as open flat grassland, with a slight terrace along its south side. ->

-> A hundred metres west of that lawn, in woodland, is an interconnected series of ponds covering an area of almost 100 x 100 m, and comprising 2 1/2 (? Originally 3) north-south ponds joined together along their southern ends as are the central and eastern ponds towards their northern ends. Mr. Heywood-Lonsdale, the owner, said these were believed to be the trenches where clay was got for bricks to build the Hall. ->

-> The west side of the Hall looked out on to the 80-metre gap between the north side of the woodland around those pools and the stables, and in the early 20C, probably soon before 1926, that view was modified by the planting up of the area beyond (previously open) as woodland while leaving two broad, straight radiating clearances as vistas through it. ->

-> Already by 1577 the predecessor of Kilmorey's house was set in a park, and by 1752 the grounds were extensive, apparently extending as far east of the river Duckow as they did west. That arrangement probably included a formal avenue running east from the front of the Hall to a bridge across the Duckow, with a second avenue running at right-angles south from the Hall to the Big Pool (Stamper, P. li. Survey of Historic Parks and Gardens in Shropshire (1993), 202-3). Study of an estate map of the mid 18th century (in the estate office at Calverhall in 1994) would no doubt allow a fuller understanding of the landscape at that time, although certain features of the map, on cursory inspection, do give rise to suspicion: notably that it appears to show a broad canal running north from the east end of Big Pool towards the Hall, ground which in fact runs up hill, and brief inspection of which revealed no trace of any such feature on the ground. ->

-> Big Pool itself, so known from the later 19th century, was apparently earlier, c. 1840, called New Pool (Shrops. R.O., Moreton Say field name map), suggesting its modification or enlargement prior to that. Further change (a diminution of its southern extent) occurred 1840 x 1890. ->

-> Major changes were made to the park by Francis, First Earl of Kilmorey (d. 1832); both William Emes and secondly Humphry Repton (in 1793) produced schemes for Shavington. The old avenues and the former main approach were done away with and new drives created which curved westwards up to the back of the house, these being carried across the Duckow by two new bridges. The more northerly of those bridges (both Listed Grade II: 1573/517-8) was widened in 1940 and now carries the minor road from Adderley to Wilkesley. The approach from the south may also have been modified at this time, by 1840 it being via 19C gates with a lodge (not occupied 1994) to the north, and down a straight drive (lined with mature trees in 1994) to the east end of the Big Pool, and thence to join the main drive to the Hall from the south-east. Any parkland east of the Duckow was apparently much reduced or given up. ->

-> The park apparently had mixed fortunes in the 19C. Writing c. 1891 Leach said' that after 1839 the park was neglected, became dilapidated, and 'more of a wilderness', the rabbits alone thriving (F. Leach, The County Seats of Shropshire (1891),246). However, in 1851 the park's recent enlargement to 1,500 acres [to include land east of the Duckow] was noted along with the completion of five miles of a brick wall around its seven-mile circumference (S. Bagshaw, Directory of Shropshire (1851),258). That wall, low and red brick, remained a notable feature of the local landscape in 1994. The missing

south-eastern section of park wall, towards Tittenley, never was built (inf. From Mr. Heywood-Lonsdale). ->

-> In 1885 a pair of new lodges (both Listed Grade II: 1573/5/17-19), either by Richard Norman Shaw or W.R. Letharby, was built at Tittenley, on the south-east side of the park. By the end of the 19th century there were also lodges around the park to the north (Wilesley Lodge), north-west (Morrey Lodge), and south close to Shavington Grange Farm (the last being the above-mentioned lodge by the south entrance). ->

-> In 1994, as for many years previously, the park was managed as farmland, and arable land ran up to the site of the east front of the Hall. It was interspersed, however, with large numbers of mature parkland trees, including some notable limes. <2>

The date of 1787-8 for the stables block, given in <2>, is considered to be problematic. Tomlinson and Emes' maps, dated 1768, show buildings in this location, which are interpreted as the stable offices, whilst Repton's map of 1792 does not show the quadrangle visible today. It is suggested that stables of c.1735 were demolished c.1822, when new quadrangular stables were laid out. See PRN 14024. <3>

Photographed during aerial survey in 2007 (general views). <4><5>

Description and Sources

Description

Styche Hall was rebuilt 1760-4 by Sir William Chambers as plain seven -bay, two-and-a-half storey building set in a fine position against a hillside (N. Pevsner, Shropshire (1958), 299). By 1808 it was set within a park, extending c.500m from the Hall in all directions (R. Baugh, Map of Shropshire (1808)). The park had gone by 1890, although Styche then retained extensive ornamental grounds both south and principally north of the Hall (O.S. 6, VIII.SE (1890); IX.SW (1889)) < 1>

A farmhouse, now at inn, circa 1600, which is protected by Grade II Listing.

Monument Types and Dates

FARMHOUSE (circa 1600, 17th century - 1600 AD to 1699 AD)

Evidence EXTANT BUILDING

Description and Sources

Description

Farmhouse, latterly inn. Circa 1600 with mid-to late C19 addition. Timber framed with plastered infill on painted dressed sandstone plinth. Extended in painted brick. Plain tile roof. Framing: close-studding (with middle rail to ground-floor) with long straight tension braces. Jettied first floors to cross wings with moulded bressumers and carved scrolled brackets and jettied gables with carved brackets supporting bressumers with carved vine-trails and moulded bottom edge. H-plan; one framed bay with projecting gabled cross wings of 2 framed bays. Addition of one framed bay in angle at rear. One storey and attic. Large dressed yellow/grey sandstone stack behind ridge off-centre to left with rebuilt or heightened brick top section, brick stack to rear of left-hand cross wing, and brick ridge stack to right-hand cross wing. Large central c. 1600 dormer with C19 two-light wooden casement and jettied gable with moulded bressumer. 1-:1-:1- window front; late C19 two-and 3-light wooden casements, some with triangular upper lights. Rendered gabled porch in angle of right-hand cross wing with C19 four-panelled door (glazed top panels). Blocked c. 1600 first floor windows in returns of cross wings (3 lights to left and 2 + 2 lights to right). Evidence of former ground-floor wooden oriel windows to cross windows (see mortices on underside of bressumers). C19 addition to left with painted imitation framing. Segmental-headed 2-light wooden casements in left-hand return front. Rear: 2 gables to left with collar and-tie-beam trusses, that to right with close studding. Lean-to additions. Interior only partly inspected. Left-hand ground-floor room with chamfered ceiling beams. Old boarded doors with wrought-iron strap hinges and Land H-hinges <2>

A programme of building survey was carried out at the Royal Oak Farm, Bletchley in association with a programme of conversion. This provides an architectural description and provisional interpretation of the sequence of development of the farmhouse. As well as listing some of the individual features of architectural interest, the report concludes that the late 16th or early 17th century farmhouse, with later additions, is primarily the result of alternative reconstruction of an older building. <3>

A mid 17th century farmhouse, which is protected by Grade II Listing. Dendrochronological dating has provided a construction date for the house as 1594.

Monument Types and Dates

FARMHOUSE (Late, 16th century to Late 19th century - 1594 AD to 1899 AD) + Sci.Date

Evidence	EXTANT BUILDING		
Sci. Date:	1594 +/- 0	Dendrochronology	Date Determined: 2005

Description and Sources

Description

Farmhouse. Mid-C17 with late C19 alterations and additions. Rendered timber frame with C19 planted timbers to front and rear wall refaced or rebuilt in painted brick. Painted brick addition, with painted imitation framing to front. 3-span plain tile roof with gables to front. Two C17 parallel ranges of 2 framed bays with later addition to south-west. 2 storeys and attic with addition of 2 storeys. North-west front: brick stack in left-hand valley, brick end stack to central range and right-hand addition with 2 external lateral brick stacks. 3-window front; C18 glazing bar sashes to left with exposed boxes; 3-light wooden attic casements. Right-hand addition with first-floor wooden cross window and ground-floor 6-pane sash. Central C19 half-glazed door (2 flush panels and 9-panes) with moulded architrave and C19 gabled timber framed porch. Left-hand return front: c. 1700 ground-and first floor leaded wooden cross windows. Attached outbuilding (now garage) with large tapered square external brick end stack. Interior: exposed square-panel framing (first floor) with short corner braces and wattle and daub infill (horsehair and straw). Many surviving mid-to late C17 fixtures and fittings. Left ground-floor front room has C17 or C17-style oak panelling with moulded cornice, moulded beam, and fireplace with bolection-moulded surround and moulded cornice. Door with 7 raised and fielded panels and H-L hinges. Ground-floor left-hand rear room with deep-chamfered beam. Late C17 staircase with closed string, large turned balusters, moulded handrail and square newel post. Left-hand first-floor front room with painted C17 panelling, chamfered beam, and fireplace with bolection-moulded surround and moulded cornice. C17 two-bay roofs with single purlins, straight wind braces and doorways with chamfered reveals. C17 and C18 panelled doors and old oak boards throughout. Heraldic stained glass, Hill and Forster, 1639 <2>

In March 2005 a Level 2 building recording survey, followed by a watching brief was carried out at Bletchley Manor in advance of plans to make alterations to the property. Bletchley Manor is an early example of a countryside house using double pile, double gabled form, which together with its prolific use of single storey close studding indicates it was a house of some status. Internally this appears to have been somewhat let down by its lack of decoration, with decorative moulding absent from exposed ceiling beams and plain inglenook fireplaces. This was rectified in the late 17th century with the complete redesigning of two of the rooms with decorative fireplaces and panelling. Altogether five phases of construction were noted during the work, with the initial construction of the property in 1594, followed by the series of modifications in the mid-late 17th century. Although alterations were made to the windows in the northwest elevation in the 18th century, the manor remained reasonably unchanged until the early part of the 19th century when a brick built range was added onto the south-east end of the building. Further modifications and improvements were then made throughout the 20th century.->

-> Dendrochronological sampling took place in November 2004 [<5>] with eight samples taken from the first floor and the north and south roof timbers. All the timber sampled was oak, and several retained sapwood. Three of the sample pieces came from the same tree, indicating that the parallel ranges were built at the same time. The combined series of five of the timbers sampled formed a 113 year site chronology, which was dated to the period 1481-1592 by comparisons with referenced chronologies. The timbers would have been felled within a relatively short period, and the most likely date for construction of this house is therefore 1594, or within a year or two after this date.<4>

Full report for dendrochronological dating. <5><6>

The primary build comprises two parallel 2-bay ranges, each of two storeys with an attic. The roofs have single staggered purlins and straight windbraces. The panelling is of mid-17th century style and the heraldic stained glass is dated 1639 – previously thought likely to be the date of the primary phase. <7>

Description and Sources

Description

Farmhouse, now house. Early C17. Timber framed with painted brick infill underbuilt in painted brick. Plain tile roof. Framing: small square panels (formerly 4 from sole plate to wall plate) with short straight corner braces. Collar and tie-beam roof trusses exposed in cross wings with king struts and v-struts. H-plan. One framed bay with cross wings of 2 framed bays. 2 storeys and attic. Large external lateral brick end stacks with pitched-roofed links to attic; that to left with recessed lozenge panels and 2 diagonal-placed square shafts and that to right with 3 square shafts, those on the outside set diagonally. Brick ridge stack off-centre to right. Central timber framed gabled full dormer with 2-light diamond-ledged wooden casement. 1:-1-:1- window front; C20 three-light diamond-ledged wooden casements. C20 carved wooden door off-centre to left in angle of cross wing with chamfered surround. One-storey lean-to at rear. Interior: timber framed cross walls. Chamfered ceiling beams with ogee stops. C18 staircase with open string, cut brackets, turned balusters, turned foot newel and moulded handrail. Left-hand ground floor room has dressed sandstone fireplace with cyma-recta moulding. Right-hand ground-floor room has fireplace with chamfered wooden lintel. Early C18 doors with 6 raised and fielded panels <2>

A late 18th century parish church, which is protected by Grade II* Listing.

Monument Types and Dates

PARISH CHURCH (tower 1769, chancel 1788, Late 18th century - 1760 AD to 1799 AD)

Evidence EXTANT BUILDING

Description and Sources

Description

Parish church. Tower, dated 1769 and nave and chancel dated 1788, builders William Magley and William Griffiths. Nave and chancel incorporating a late C12 core. Restored, altered and south porch added in 1900 by Mr. Hodgson Fowler. Red brick with grey sandstone ashlar dressings. East end rebuilt or refaced in 1900 in red sandstone ashlar. Plain tile roofs. 3-bay nave and chancel in one, west tower and south porch. Nave and chancel: chamfered brick plinth, raised brick quoins, stone cill band at gallery level, dentil brick eaves cornice and parapeted gable end to west with stone coping and shaped kneelers. South side: 3 bays; 2 tiers of round-arched windows with raised brick architraves, raised keystones and imposts blocks and metal cross windows with leaded lights. 2 blind upper-tier windows to right, that in centre with remains of inscriptions: "THIS CHURCH / was Rebuilt / AD 1788 / /WALTER. /Church Wardens". Round-arched doorway between first and second windows from left with architrave, imposts blocks and keystone, and pair of C19 doors. Gabled wooden porch on chamfered red sandstone plinth with Tudor-arched entrance, hollow-chamfered scalloped barge boards and 3-bay sides with ogee-headed lights. Flanking cast-iron bootscrapers. Round-arched priest's doorway in right-hand bay with architrave, impost blocks and keystone. North side: 2 bays. 2-tiers of windows. Plinth stops short to right. Yellow/grey sandstone datestone between upper windows inscribed: "William Magley / William Griffiths / Builders A. D. 1788". Oval yellow sandstone memorial plaque to right of right-hand lower window inscribed: "M. S. E. / MARIA / THEOPHILHOULBROOKELLE / Carifsima Conjux / Mortalia reliquit 16 Die Junii AD 1786 / Sueoque /Aetatis 31 / I. E. T. S. E. / MARIA / Infantula / E. F. " East end: double chamfered plinth, flanking buttresses with chamfered offsets and parapeted gable end with coping, trefoil-panelled gabled kneelers and cross at apex. Large Perpendicular Style window of 5 cinquefoil-headed lights with taller centre ogee light, panelled tracery, moulded reveals and hoodmould with uncarved stops. Small quatrefoil-in-lozenge panel in apex of gable. Tower: 3 stages. Double-chamfered stone plinth, stone string courses at setbacks to each stage, dentil bricks to coved stone cornice, blocking course and small corner obelisks. Flagpole. Round-arched louvred 2-light belfry openings with Y-tracery and architraves with impost blocks and keystones. Second-stage circular panels, that to south with moulded stone architrave and clock, that to north also with clock, and that to south rendered (mostly fallen off at time of survey, July 1986) and with datestone illegible at time of survey. First-stage lunette to west with radial glazing bars, stone architrave and cill and keystone. Round-arched south doorway with stone architrave, impost blocks and keystone and C18 nail-studded boarded door with decorative wrought-iron strap hinges. Remains of stone memorial tablet to north; square with husk border and 2 fluted brackets. Inscribed to: Mrs MARGARET CORSER Wife of / Mr JOHN CORSER of WHITCHURCH / Died 23 d Nov r 1778 Aged 75. " and other members of the Corser family. Interior: late C12 round-arched west doorway (into tower) with inner chamfer, one order of shafts (missing) with stiff-leaf capitals, moulded impost blocks, roll-moulded arch and outer roll moulding. Gothic memorial door dated 1932. Late C12 roll-moulded round-arched piscina to south. East window of 1900 has nook shafts with moulded bases and capitals, moulded inner arch and hoodmould with carved stops. Integral stone reredos beneath window with 5 cinquefoil-headed panels, panelled spandrels and carved frieze above with moulded top. Flat nave roof with moulded cornice. C19 two-bay chancel roof has arch-braced chamfered tiebeams with central carved panels and resting on stone corbels; crosspanels between, also with carved bosses. Fittings: large west gallery dated 1634 consisting of large ovolo-moulded beam with ogee stops, carved strapwork to soffit and carved trail to front, ovolo-moulded post to left with fluted cap, and underside with 4 ogee-stopped ovolo moulded beams; balustrade to front with stubby balusters and inscription to front: "THIS GALLERY WAS BIULT ANO DOMI 1634: 10 POWNDE TOWARDS THE COST OF IT WAS GIVEN BY THE RIGHT WORLL Ms JANE GROSIVENOR OF MORTON SAY AND ALL Y TIMBER WAS GIVEN BY THE RT WORLL ARTHUR SANDFORD OF SANDFORD ESQVER. "; dog-leg staircase to rear, with steps formed from solid blocks, closed string, turned balusters, moulded grip handrail, and square newels with globe or ovoid finials. C17 or C17-style dado panelling around walls. Circular red/grey sandstone font with moulded base and top and wooden cover. Wooden pulpit of c. 1900 with pierced traceried panels and carved frieze. 2 wooden eagle lecterns. Screen of c. 1900; 2:1:2 bays with linenfold lower panels, cusped pierced heads with carved spandrels, carved vine trail frieze, rosettes and brattishing; central rood cross. C20 choir stalls with carved poppyheads. Carved pelmet over west door. Stained glass: east window of c. 1900 by Kempe. Monuments: large stone chest tomb to Jane Vernon (d. 1623) and her two husbands, John Bostock and Richard Grosvenor; recumbent effigies, rising slightly from front to back, and 2 x 3 bay chest with Tuscan half columns; round arch to rear with imposts and cherub in keystone and strapwork and keystone within, flanking free-standing Corinthian columns, and cartouche above with shield and strapwork and flanking obelisks. Restored wooden tablet to Elizabeth, Mary and Rachell Vernon of 1642 (signed "T:PVE") with 3 kneeling figures flanked by columns and with shield and obelisks above. Several late C18 and early C19 tablets to members of the Clive, Corser and other families. Simple tablet to Robert, Lord Clive ("Primus in Indis") who died in 1774 and is buried in the church. The builder of the 1900 work was Mr. Bridgeman of Lichfield. D. H. S. Cranage, *An Architectural Account of the Churches of Shropshire*, Part 8, pp705-7; *Buildings of England* pp205-6 <2>

EXTANT BUILDING

Description and Sources

Description

Stable block, now partly an agricultural building. Circa 1685, restored and extended in the late C19. Red brick with grey sandstone ashlar dressings. Hipped slate roof. Shallow H-plan with later ranges forming courtyard at rear. 2 storeys. East front: chamfered quoins, flat string course and moulded wooden eaves cornice. C19 brick ridge stacks off-centre to left and right and brick ridge stack to left-hand rear wing. Central octagonal wooden cupola (probably altered in the C19) with moulded cornice to base, fluted Greek Doric columns supporting moulded cornice, and low lead dome with weathervane (almost detached at time of survey. July 1986). 2:1:1:1:2 bays; wooden cross windows with stone cills and gauged-brick heads. Single-light windows in return of left-hand wing. Central quoined break rising above cornice to open triangular pediment with circular painted wooden clock in tympanum (hands missing at time of survey). Central first-floor circular panel with trompe-l'oeil window. Central round-arched carriageway with rusticated reveals, impost blocks and raised keystone with moulded top. Pair of probably C19 large 4 x 4 panelled wooden doors with wrought-iron strap hinges and large C19 wrought-iron lamp bracket above. Pair of blocked segmental-arched openings flanking entrance. Ground-floor window in second bay from left has been cut down in the late C19 to form a door. Return elevations with 3 first-floor and 2 ground-floor windows; 2- and 3-light mullioned and transomed casements. Interior not inspected. Three C19 ranges around courtyard at rear. 2 storeys. Dentil brick eaves cornice and verges. Gauged-brick elliptical-arched entrance in gabled break to north with impost bands and keystone, and pair of large panelled doors. Similar entrance to south with round archway and triangular pediment above. Shavington Hall was dated 1685. It stood to the south-west of the stable block and was demolished in 1959. It had been altered in 1885-6 by Richard Norman Shaw and again (internally) in 1903 by Ernest Newton. The late C19 restoration of the stable block and the additions might be the work of Shaw. The stable block still stands at the centre of a landscaped park with a number of lakes. Shavington Gardens are not included on this list. Buildings of England, p240-1; Country Life, Vol. XLIV, pp92-8 and 112-17; Andrew Saint, Richard Norman Shaw, p430 <2>

A conservation plan was prepared in December 2014 to inform planning for the conversion of Shavington Stables. This includes an assessment of their significance and detailed history of their development in relation to the site of the hall (PRN 01674). This history is largely constructed from documentary and cartographic sources, rather than a detailed examination of the building itself. ->

-> The fact that no archival record has been found of the stables which served Thomas Needham's late 17th Century Hall is suggested as representing that the 6th Viscount did not build stables for his new house but instead made use of preexisting stables. These 'pre-existing' stables stood alongside the new Hall for half a century. ->

-> The first documentary record of a stables in this location is given as 1735 (contra <2>). The 1735 built stables were ranged along the north side of a square yard on whose western side was set the Hall's 'Offices' (Laundry and Brew House), built by the 9th Viscount Kilmorey. The 9th Viscount's stables lasted less than a century, being pulled down in the early 1820s. Nothing of them remains. However, the 1735 built Offices do survive. When in c.1822 the 1735 built stables were pulled down new stables were built against the back (western side) of the 1735 built Offices. Constructed at the instruction of the energetic Francis, 1st Earl Kilmorey, the quadrangular arrangement of stables survived unaltered for just over fifty years. Arthur P. Heywood-Lonsdale bought the Shavington Estate in 1885 and immediately commenced an ambitious programme of works to improve both the Hall and its stables. Although much of the external fabric of the early 1820s stables buildings was retained, the modifications were extensive: Window openings were refenestrated, an upper floor was added to the north stables range, a lean-to built against the outer wall of the west stables range and all interiors were improved. In the 1735 built Offices whilst the spaces to the north of the archway were retained in use as the Laundry and Wash House, the Brew House was removed and the southern spaces converted for human habitation. ->

-> In 1892 the construction of a new laundry in Shavington village allowed the north part of the 1735 Offices to be converted for use as stables & the Head Groom's house. In c.1910 a substantial Motor House range was built against the north wall of the quadrangle's north range. At about the same time a single storey tack room was constructed to the east of the stables' south range. ->

-> During World War II both the Hall and the Stables at Shavington were occupied by the military. Minor modifications were made to the stables: For instance the formerly blind window openings of the north and south ranges' first floor lofts were opened up and fenestrated to provide natural light to the loft spaces used to accommodate other ranks. Shavington Hall was demolished in the late 1950s. Whilst the Stables were not demolished, the loss of the Hall spelt redundancy for such

HER Number 14024

Site Name Stable block, approximately 30m to the South of Shavington Gardens, Shavington Park

ancillary buildings. The building has stood derelict ever since. <6>

A comprehensive photographic survey was undertaken of the former stable block at Shavington Park, in association with a planning application. This was related to a conservation plan prepared in 2014 (ESA 7359). <7>

An early to mid 17th century farmhouse, which is protected by Grade II Listing.

Monument Types and Dates

FARMHOUSE (early to mid, 17th century to Late 19th century - 1600 AD to 1899 AD)

Evidence EXTANT BUILDING

Description and Sources

Description

Farmhouse, now house. Early to mid-C17 with late C17 or early C18 addition and late C19 or early C19 alterations and addition. Timber framed with painted brick nogging on brick plinth. Rendered gable end to south-east. Partly rebuilt and extended in brick painted to represent framing. Machine tile roof. Framing: tall rectangular panels (2 from sole plate to former wall plate) with short straight corner braces. Baffle-entry plan of 2 framed bays with c. 1700 addition to south-east. 2 storeys. North-east front: brick ridge stack off centre to right. 4-window front; C20 two-, 3-and 4-light metal casements. C19 four-panelled (lower flush) door between first and second windows from right with lean-to porch. Right-hand gable end: slightly jettied gable with chamfered tie-beam and truss with 2 collars, queen struts, king strut and curved v-struts. C20 three-light casements. Late C19 two-storey rear wing. Eaves raised, probably in early C20 (see extra panel beneath eaves and truss in gable end). <2>

A small former country house, 1762-6, now divided into flats, which is protected by Grade II Listing.

Monument Types and Dates

COUNTRY HOUSE (1762-6, Early 18th century to Early 20th century (pre-war) - 1700 AD to 1913 AD)

Evidence EXTANT BUILDING

Description and Sources

Description

Small country house, now divided into flats. 1762-6, by Sir William Chambers for the 1st Lord Clive and bays added and other alterations by Joseph Bromfield of Shrewsbury in 1796-8 for the Hon. Robert Clive. Further alterations of c. 1900. Painted brick with hipped plain tile roof. Square plan. 3 storeys over basement. South-west (garden) front: rendered chamfered plinth, stone string course between first and second floors, coved stone cornice and blocking course. Rendered brick ridge stacks off-centre to left and right. 3:2:3 bays with shallow recessed centre and pair of later full-height canted bays; glazing bar sashes with stone cills. Large semi-circular relieving arch over central segmental-headed first-floor window with architrave, and cut down c. 1900 with small balcony. Ground-floor windows and first-floor windows in bays have been altered c. 1900 with round-arched lights in the lower sashes, (giving the impression that the upper and lower sashes of the windows have been exchanged). 3 stone steps up to central c. 1900 small-paned half-glazed door with bolection-moulded lower panel, moulded architrave and panel above. Porch of c. 1900 or later consisting of pair of doors with 3 raised and fielded panels, architrave with cable moulding and doorcase consisting of Corinthian pilasters supporting entablature and triangular-pedimented gable. Recessed corners with cable moulding, and side windows. Panelled soffit. Right-hand return front: 6 bays; glazing bar sashes (ground-floor sashes with c. 1900 alteration as front). Left-hand return front: 2:2:2 bays with recessed centre; glazing bar sashes, some painted in imitation. Rear of 2:3:2 bays with central break. Interior: Circa 1762-6 with alterations of c. 1796-8 and c. 1900. Entrance hall: moulded dado rail and cornice. 6 panelled side doors, each with lugged architrave, frieze and modillion cornice. Pair of c. 1900 small-paned glazed doors in rear wall with radial fanlight and moulded architrave. Windows with plain scrolled architraves. Right-hand ground-floor (drawing) room: plain dado with moulded base, and rail. Rich modillion cornice to elaborate c. 1900 elaborate panelled enriched plaster ceiling. 3 six-panelled doors with egg and dart enrichment, and each has lugged architrave with egg and dart enrichment, frieze with scrolled ornament and modillion cornice. Circa 1762 fireplace has marble surround with egg and dart enrichment, fluted tapered pilasters, plain frieze, and cornice with bead and reel and egg and dart enrichment. Panelled window shutters with egg and dart enrichment and architraves with scrolled shoulders. Left-hand ground-floor (dining) room: dado with moulded base and rail with egg and dart enrichment. Rich modillion cornice and c. 1900 elaborate enriched plaster ceiling with central oval panel, vine trails, scrolled ornament etc. 6-panelled doors, each with egg and dart enrichment, lugged architrave, frieze with scrolled ornament and cornucopia, and rich moulded cornice. Fireplace has marble surround with staff moulding, tall scrolled brackets with shells at feet, amphorae, daggers, sword and torch in frieze, and cornice with bead and reel and egg and dart enrichment. Panelled window shutters with egg and dart enrichment and architraves with scrolled shoulders. Staircase hall behind entrance hall: c. 1796-8. Three-flight staircase rising 2 storeys with landings, open string, moulded nosings, stick balusters with single flute (2 per tread), moulded handrail and wreathed foot newel with slim columnar newel post. Moulded cornice with mutules. Oval toplight. Oak back staircase of c. 1762-6; dog-leg with closed string, turned balusters, columnar newel posts and ramped handrail. Left-hand first-floor front room: carved dado rail and architraves. Enriched plaster frieze. Fireplace with marble inner surround, lugged architrave carved scrolls to frieze and carved cornice. Styche was the family home of the Clive family. Lord Clive was born in the old timber framed house in 1725 and employed Chambers to rebuilt it in 1762-6. It is possible that the second floor was added in 1796-8, at the same time as the bays. Buildings of England, p229; Colvin, pp142 and 207; H. E. Forrest, Some Old Shropshire Houses and their Owners, pp55-7 <2>

Roger Eykyn, a Staffordshire man, may have carved the doors 1760-4.<8>

Description and Sources

Description

Mid-to late C18 incorporating C17 core. Red brick with plain tile roof. 3 storeys. Plat band between ground and first floors, projecting eaves and parapeted gable ends with chamfered stone copings and moulded red sandstone kneelers. Brick ridge stack off-centre to right and integral brick end stack to left. Baffle-entry 3-cell plan. 1-:2-:2- window front; glazing bar sashes with painted stone cills and lintels. Half-glazed door between second and third windows off-centre to right with early C19 surround consisting of pilasters, frieze and cornice, and bracketed hood. Each gable end with 2 plat bands. Kitchen wing at rear with integral brick end stack; coach house and stables returning with plat band and integral lateral stack. Interior: central ground-floor room has large open C17 fireplace with ogee-stopped chamfered wooden lintel. Small salt cupboard to left has C18 door with single raised and fielded panel. C18 dog-leg staircase stack, rising to attic, with closed string, turned balusters, moulded handrail and square foot newel. Old door beneath staircase with H-hinges. Back bedroom has reused C17 door with carved lozenges. C17 plank and muntin doors and other old doors. Pegged door frames. Old oak floorboards. Some windows with panelled shutters. Cased ground-floor beams. Second-floor rooms with evidence of C17 roof line. The top floor appears to have been added when the house was rebuilt in the C18 <2>

Monument Types and Dates

BRIDGE (Late 18th century - 1760 AD to 1799 AD)
Evidence EXTANT STRUCTURE

Description and Sources

Description

Estate bridge. Late C18. Dressed red/grey sandstone. 2 segmental arches with round-topped semi-circular breakwaters and flanking pilaster buttresses. Quadrant wing walls. Moulded string course to parapet and square end piers with globe finials (missing from north-west end. July 1986). The bridge carries an estate track across the river Duckow. The track was formerly the direct route from the Tittenley Lodge (see Adderley) and Shavington Hall (demolished 1959) <1>

Sci. Date: 1573 +/- 0 Dendrochronology Date Determined: 1994

RESTAURANT (14th century to Late 19th century - 1300 AD? to 1899 AD)

Evidence EXTANT BUILDING

Description and Sources

Description

Farmhouse, now restaurant. Probably C14 with mid-C17 alterations and mid-to late C19 alterations and additions. Rendered timber frame of cruck construction, partly rebuilt and extended in painted brick. Plain tile roof. 3 bays of former quasi aisled hall with rebuilt cross wing to south-west and C19 addition to south-east. One storey and attic with 2-storey additions. North-west front: brick ridge stack off centre to left, external brick end stack to left and gabled C19 flush cross wing to right with toothed-brick eaves cornice and integral brick end stack. Pair of small gabled eaves dormers with 2-light wooden casements. 2-window front; C19 three-light wooden casement to left (central window obscured by climbing plant at time of survey - July 1987). C20 glazed door to right with C20 lean-to porch. Lean-to addition to left with 2-light casement to front. Rear wing with toothed brick eaves cornice and external lateral brick stack. Interior: substantial remains of former quasi aisled hall. Central base cruck truss (former hall truss) with continuous chamfer, arched bracing and cambered collar. Probable former spere truss with large jowl posts, arched bracing and cambered tie-beam. Roof raised at some time (see evidence of joints for former arcade plate). First-floor and stack inserted c. 1600. Central ground-floor room has pair of ovolo-moulded ceiling beams with ogee stops and plain joists. Large open fireplace with large lintel (cut back at some time). Reordered C17 panelling. Square-panelled framing in front wall exposed internally. Although much altered much of the C14 aisled hall survives. The open hall was probably of 2 bays, one each side of the cruck truss, with at least one bay at the lower end below the spere truss and at least one upper bay above the hall, possibly in the form of a wing on the site of the present C19 cross wing. The present entrance was probably created in the C19. Formerly it would have been in line with a screens passage below the spere truss. This is a rare and important survival of an aisled hall with a base cruck truss <1>

The remains of a base-cruck two-bay hall and its dais end remain in the complex. Dendro-dated 1573 (hall is base cruck but undatable). Sketch of layout and ground floor plan, 3 sections and detail of squint.<2>

Detailed description of the building, photograph from NW, sketch of layout and ground floor plan, 3 sections and detail of squint.<3>

Oldfields Farm, Moreton Say, is an isolated farmhouse in North Shropshire with a two-bay base-cruck hall which did not date. The upper parts of the hase-cruck structure had as much as 8mm of soot encrustation. An unusual feature was the later insertion of a squint, or more likely a vent, in what might be interpreted as the dais truss. It is a wide strut between tiebeam and collar and is pierced with a pair of chamfered slots, the heads of which rise symmetrically to form a pointed head. If the dais truss has been correctly identified, then the dated timbers relate to a rebuilt solar end with a divided service below, all of 1573. The 1567-1601 date range for the wall plate in the hall indicates that it too may have been repaired at the same time. <4>

19284	Granary apx 10m to W of Oldfields Farmhouse	Building

An early to mid 19th century granary, incorporating some 14th century fabric, which is protected by Grade II Listing.

Monument Types and Dates

GRANARY (14th century to Mid 19th century - 1300 AD to 1879 AD)

Evidence EXTANT BUILDING

Description and Sources

Description

Granary. Early to mid-C19, incorporating some C14 fabric. Timber framed with red brick nogging on dressed red sandstone plinths. Rear wall rebuilt in brick. Plain tile roof. Framing: light framing with long straight tension braces. 2 framed bays. One storey and loft. 3 loft openings, 2 to outside louvred; ground-floor boarded window to right and central boarded door. Collar and tie-beam end trusses with queen struts. One-storey brick addition to left with segmental-headed window and segmental-headed stable door to right. Interior: central tie-beam truss with king post and side struts. Single purlins. Central cross frame with tension braces. The granary incorporates some old timbers, probably reused from Oldfields Farmhouse (qv) when it was altered in the C19 (see corner posts and tie-beams). Included for group value <1>

A farmhouse dated 1536, with late 16th/early 17th/18th and late 19th century alterations, which is protected by Grade II Listing.

Monument Types and Dates

FARMHOUSE (16th century to Late 19th century - 1536 AD to 1899 AD)
Evidence EXTANT BUILDING

Description and Sources

Description

Farmhouse. Dated 1536 with probably late C16 or early C17 addition, and C18 and late C19 additions at rear. Timber framed with plastered and painted brick infill; left-hand gable end rebuilt in brick painted to represent framing. Plain tile roof. C19 red brick addition with slate roof. Framing: first-floor close studding and ground-floor rectangular panels (2 from sole plate to first floor level) with short straight corner panels. Addition with large square panels (2 from sole plate to wall plate). 2 framed bays with c. 1600 addition to south-west of one framed bay. One storey and attic. North-west front: brick ridge stack off-centre to left and brick lateral stack at rear to right. 3 large timber framed gabled eaves dormers with 3-light wooden-framed metal casements. Central gable dated: "AD 1536". Two-window front; C20 three-light wooden casements to left. Boarded door off centre to right with moulded architrave and late C19 timber framed gabled porch. Right-hand gable end: slightly jettied first floor with moulded bressumer and jettied gable with shaped end brackets. Gable rebuilt above collar in painted C19 brick. 3-light wooden attic casement and late C19 ground-floor square bay with 1-:3-:1- light small-paned wooden casements, bracketed eaves and hipped tile roof, C18 and C19 garbled brick wings at rear with brick stack in valley. Interior: central ground-floor room with ovolo-moulded ceiling beam (running front to back); large open fireplace has chamfered wooden lintel with ogee stops. Right-hand ground-floor room with chamfered ceiling beam (running front to back). 2-panelled door of c. 1700 in left-hand ground-floor room with H-L hinges. Right-hand cross wall with angle braces and collar and tie-beam roof truss with v-struts. Tie-beams cut to make doorway (now blocked). Left-hand cross wall (former external wall) with close-studding and jettied gable with chamfered tie-beam and collar. Left-hand bay with staggered purlins and wind braces. Right-hand bay with chamfered purlins. C18 rear wing with C18 king-post truss <1>

A barn, circa 1600 with 18th and late 19th century alterations, which is protected by Grade II Listing.

Monument Types and Dates

BARN (17th century to Late 19th century - 1600 AD to 1899 AD)

Evidence EXTANT BUILDING

Description and Sources

Description

Barn. Circa 1600 with C18 and late C19 alterations. Weatherboarded timber frame, partly rebuilt with red brick nogging. Left-hand end wall rebuilt in C18 red brick. Corrugated-iron roof. Framing: small square panels (3 from sole plate to wall plate) with short curved corner braces. 3 framed bays. 3 boarded loft doors. Pair of central ground-floor boarded doors and pair of large boarded doors to left. Lozenge-shaped vents in ground-floor brickwork. Boarded loft door in right-hand gable end and 2 boarded loft doors to rear. Interior: one cross frame surviving with sole plate on low brick wall and central post. Collar and tie-beam trusses with queen struts and v-struts. Pairs of purlins with straight wind braces. C18 brick end wall with pilaster buttresses and diamond-shaped vents. This barn forms part of an early farmstead group with Shavington Wood Farmhouse (qv) <1>

A 16th/17th century house, with late 19th/20th century alterations, which is protected by Grade II Listing.

Monument Types and Dates

HOUSE (16th century to 20th century (post-war) - 1500 AD to 1999 AD)

Evidence EXTANT BUILDING

Description and Sources

Description

House. C16 and C17 with late C19 and C20 alterations and additions. Timber framed, partly of cruck construction, with painted brick nogging on brick plinth. Plain tile roof. Framing: C16 rectangular panels and C17 square panels. Eaves raised by one panel, probably in C19. Baffle-entry plan of 2 framed bays. 2 storeys. Brick ridge stack, just off-centre to left (rebuilt above ridge in C20). 3 first-floor windows and 2 ground-floor windows; C20 two-and 3-light wooden and woodenframed metal casements. Roughly-central half-glazed door with C20 gabled porch. C20 one-storey addition to right with 4-light wooden casement to front. Interior: floor room with chamfered and stopped beam and joists and right-hand ground-floor room with chamfered beam and plain joists. Fireplace with chamfered wooden lintel <1>

A estate lodge, dated 1875, which is protected by Grade II Listing.

Monument Types and Dates

LODGE (Mid 19th century - 1875 AD)

Evidence EXTANT BUILDING

Description and Sources

Description

Estate lodge. Dated 1875, probably by William Eden Nesfield. Timber framed with plastered infill panels on red brick plinth. Tile-hung gables and plain tile roof, hipped to left. Irregular T-plan. One storey and attic. Chamfered plinth and covered eaves. Globe finials at apex of hip and gables. Brick ridge stack at junction of 2 ranges and external lateral brick stack to rear, each consisting of a pair of star-shaped shafts with oversailing tops. Right-hand gabled wing has ground-floor canted bay with 2-:3-:2- light wooden mullioned and transomed window, jettied attic with roll-moulded bressumer and end brackets, attic oriel consisting of 3-light wooden mullioned and transomed window with hipped roof and covered base with shaped end brackets, and jettied gable with a series of small brackets supporting a roll-moulded tie-beam and wall plates with shaped eaves. Lower bressumer dated: "JP & AM / 1875". Left-hand range with small 2-light attic casement beneath eaves to right and ground-floor 3-light mullioned and transomed window to left. Boarded door in angle of wing to right with rollmoulded surround and lean-to timber framed porch consisting of polygonal arched entrance, chamfered arched braces with carved spandrels, carved bracket supporting wall plate to left, and 4 ogee-headed side lights. Left-hand gable end: full-height gabled square bay with 1-:4-:1- light mullioned and transomed ground-floor window, slightly jettied attic with roll-moulded bressumer and small brackets, 4-light mullioned and transomed attic window and shaped brackets supporting wall plates. Right-hand return front: pair of raking dormers with C20 two-light casements. C20 additions at rear. Interior not inspected. Nesfield designed Cloverley Hall (see Ightfield CP) nearby, built in 1864-70 but now demolished. This lodge and Pool Cottage (qv) are attributed to him on stylistic grounds. Buildings of England, p107; Jill Franklin, The Gentleman's Country House and its Plan 1835-1914, p211 <1><2><3>

19294	New Street Lane Farmhouse NEW STREET LANE	Building

A 17th century farmhouse, remodelled in the mid 18th century, which is protected by Grade II Listing.

Monument Types and Dates

FARMHOUSE (17th century to Mid 18th century - 1600 AD to 1760 AD)

Evidence EXTANT BUILDING

Description and Sources

Description

Farmhouse. C17, remodelled in the mid-C18. Late C19 addition. Red brick with timber framed core. Plain tile roof. C17 house of 2 or 3 framed bays, rebuilt and extended in the C18 in a Gothic style. C19 wing at rear. One storey and 2 storeys with gable-lit attics. Plinth, raised brick quoins and dentil brick eaves cornice. Integral brick end stack to right and brick stack to rear wing. 3-window front. First-floor 2-and 3-light wooden and wooden-framed metal casements. Ground-floor segmental-headed 2-light wooden casement to left and two 4-light wooden casements to right with Gothic arches over 2 centre lights (blank to left). Boarded door between first and second windows off-centre to right with pegged frame and gabled porch. Right-hand gable end with segmental-headed 2-light attic casement and left-hand gable end with segmental headed first-floor and attic 2-light wooden casements. C19 rear wing with toothed-brick eaves cornice and integral brick end stack. Interior: C17 core. Central room has pair of ovolo-moulded ceiling beams with ogee stops. Left-hand cross wall with square panelled timber framing. Front wall with section of bracket. The right-hand (one storey and attic) part was probably added when the house was remodelled in the C18. Formerly known as Unity Farm <1>

A pair of estate cottages, circa 1903, probably by Ernest Newton, which are protected by Grade II Listing.

Monument Types and Dates

ESTATE COTTAGE (Early 20th century (pre-war) - 1903 AD?)

Evidence EXTANT BUILDING

Description and Sources

Description

Pair of estate cottages. Circa 1903, probably by Ernest Newton. Red brick with tile-hung attic and pebbledashed porches with tile-hung gables. Plain tile roof, hipped over rear wings. U-plan. One storey and attic. South-east (garden) front: central brick ridge stack and brick ridge stacks at junctions of porches and cross wings, each of square section with 2 triangular-section projections on each face. Plain barge boards, pegged over purlin ends. Pair of gabled wings with recessed ground floor (not in line with gables) between, and flush attic with central raking semi dormer. 4-window front; 5-light leaded wooden casements (paired 4-light to dormer), those to ground floor with gauged brick heads. Left-and right-hand return fronts: ground-floor 3-and 5 light leaded wooden casements. Central 2-storey porch with open ground floor consisting of 2 square oak posts supporting corner brackets and moulded bressumer; first-floor 4-light leaded wooden casement. Stone step up to boarded door with small window to one side. Rear: wings with 5-light leaded wooden attic casements and catslide roofs each side of hip descending over set-back outshuts. One storey brick service block projecting between rear wings with hipped roof and catslide over outshut at end. Roofed passageways between wings and outbuilding leading to half-glazed back doors. Interiors not inspected. These cottages have been attributed (Saint) to Richard Norman Shaw who carried out work at Shavington Hall (demolished 1959) in 1885-6. Stylistically, however, they appear more likely to be the work of Ernest Newton who worked at Shavington in 1903. Andrew Saint, Richard Norman Shaw, pp2413 and p430 <1><2>

19296	Shavington Bridge (NW of 2), apx 650m SW of Bankhouse Farmhouse	Building

A probable late 18th century bridge, widened in 1940, which is protected by Grade II Listing.

Monument Types and Dates

BRIDGE (Late 18th century to Second World War - 1760 AD to 1940 AD)
Evidence EXTANT STRUCTURE

Description and Sources

Description

Bridge. Probably late C18, widened in 1940. Grey sandstone ashlar. 2 segmental arches with round-topped circular breakwaters and flanking pilaster buttresses. Quadrant wing walls. Moulded string course to parapet and square end piers with globe finials (only one at north-west and remaining. July 1986). Initially built by the estate this bridge and its neighbour (see Adderley CP - SA 14025) were widened by the County Council in 1940, reusing the ashlar masonry. The bridges carry the minor road from Adderley to Wilkesley across the River Duckow at a point where it has been widened to form an ornamental lake known as the Long Pool. Bankhouse farmhouse is in Adderley and is not included on this list. Anthony Blackwall, *Historic Bridges of Shropshire*, Shropshire Libraries, p66 <1><2>

Evidence EXTANT BUILDING

Description and Sources

Description

Stable block and coach house, now old peoples' home. Circa 1762-6, probably by Sir William Chambers, with late C20 alterations. Red brick with some grey sandstone ashlar dressings. Hipped plain tile roofs. Rectangular courtyard plain with 2 ranges. L-shaped range to north with pavilion (former coach house) in southern corner linked to main block by courtyard wall. 2 storeys. South-west front: pavilion to left and end of L-shaped range to right, each with chamfered plinth, raised brick quoins and dentil brick eaves cornice. Left-hand block with integral brick stacks and 2 brick stacks on ridge of right-hand range. Each of 3 bays; C20 small-paned metal casements (in imitation of former glazing bar sashes) with stone cills and gauged-brick heads with raised keystones. Round-arched ground-floor windows to left-hand block. Each block has central window with moulded stone architrave, pulvinated frieze and moulded cornice (the left-hand window was in the process of being cut down to form a doorway at the time of survey - July 1986). Central gateway between blocks consisting short walls and gatepiers with chamfered stone plinths and moulded stone copings. 7-bay left-hand return front of right-hand block; C20 casements in imitation of sashes with stone cills and gauged-brick heads. Right-hand return front of 5 bays. North-east (garden) front: Raised brick quoins. Brick ridge stack off-centre to left and integral brick end stack to right. Square wooden cupola to right consisting of round-arched openings with moulded architraves and keys, and with clock and louvres to north-east; corner piers supporting moulded cornice to tented lead cap with weathervane. 3:4 bays, right-hand part set back; C20 casements (replacing former glazing bar sashes) with stone cills and gauged-brick heads with raised keystones. Second ground-floor window from left with moulded architrave, pulvinated frieze and moulded cornice. Round-arched entrance in second bay from right (late C20 door and glazing) with large stone doorcase consisting of moulded architrave with impost blocks and keystone, and flanking Tuscan pilasters supporting full entablature. Opposed round-arched entrance at rear. Brick courtyard wall with stone coping to north-west linking the 2 blocks. Interior not inspected. Photographs (NMR) show the interior of the stables before alteration with moulded plaster cornices and octagonal oak posts. This was formerly the stable block and coach house for Styche Hall (qv), certainly by William Chambers. Despite the alterations this is still a fine and well-detailed example of a large C18 stable block, and is particularly notable for its unusual plan form <1>

Monument Types and Dates

FARMHOUSE (Late 18th century to Early 19th century - 1760 AD to 1837 AD)

Evidence EXTANT BUILDING

Description and Sources

Description

Farmhouse. Late C18, refenestrated and heightened in the early C19. Red brick with hipped slate roof. 3 storeys. Plat band between ground and first floors and dentil brick eaves cornice. Pair of brick ridge stacks, off-centre to left and right. 3 bays; glazing bar sashes with painted stone cills and slightly segmental heads. Mid-C19 half-glazed door with doorcase consisting of attached unfluted Greek Doric columns supporting entablature. 2-bay return fronts. Left-hand return front with inserted 6-panelled door to left. One-storey wing to rear with plat band and brick ridge stack. Before the early C19 alterations the house was of 2 storeys with a 5-bay front (see blocked segmental-headed windows and change in brickwork to top storey) <1>

Description and Sources

Description

A hammerstone or net sinker, 4 inches in diameter with hour-glass perforation, was found during road works near the Longford turning, w of Market Drayton. The stone is a coarse, ashy grit, probably a discoid pebble of Lake District origin found in local boulder clay. The waist of the boring hole is grooved as if cut by a thong <1a>

WATER MEADOW ((pre) Early 19th century - 1800 AD to 1837 AD)

Evidence DOCUMENTARY EVIDENCE

Evidence EARTHWORK

Description and Sources

Description

A study of water meadows carried out in East Shropshire lists a water meadow of post medieval date at this site [site 003]. <1>

Extensive earthworks visible in this area on LiDAR. <2>

Features associated with this complex were identified by Michael Fradley across this area. This included a sluice and leat at SJ 64914 32342 and a possible fording point across the River Tern. The stone lined remnants of a well were also identified at SJ 6499 3239. <3>

Description

Loose Courtyard with farm buildings on two sides of the yard. Additional Plan Details: L-Plan. Date Evidence from Farmhouse: 19th Century. Date Evidence from Working Building(s): None. Position of Farmhouse: Attached to agricultural range. Farmstead Location: Isolated. Survival: Partial Loss - less than 50% change. Confidence: Medium.

Other Notes: Large modern sheds to the side of the historic farmstead suggest that the farmstead is still in use. May not have been a working farm at time of historic mapping, although farm buildings are evident on the site. <1>

HER Number 24895

Site Name Morton Lodge

HER Number	Site Name	Record Type
24895	Morton Lodge	Monument

Morton Lodge, a farmstead first identified and classified by the Historic Farmsteads Characterisation Project, 2008 – 2010, (ESA6427), largely from the digital version of the c.1900 OS large scale mapping.

Monument Types and Dates

FARMSTEAD (Early 19th century to Unknown - 1800 AD?)
Evidence DOCUMENTARY EVIDENCE

Description and Sources

Description

Regular Courtyard U-Plan. Additional Plan Details: None. Date Evidence from Farmhouse: 19th Century. Date Evidence from Working Building(s): None.

Position of Farmhouse: Attached to agricultural range. Farmstead Location: Hamlet. Survival: Total Change - Farmstead survives but complete alt. Confidence: Low.

Other Notes: Difference in plan suggest new house on site. Possibly originally related to Church farm. Associated farmhouse location unclear. Does have separate pump. <1>

Moreton Hall Farm, a farmstead first identified and classified by the Historic Farmsteads Characterisation Project, 2008 – 2010, (ESA6427), largely from the digital version of the c.1900 OS large scale mapping.

Monument Types and Dates

FARMSTEAD (Early 19th century to Unknown - 1800 AD?)
Evidence DOCUMENTARY EVIDENCE

Description and Sources

Description

Regular Courtyard E-Plan. Additional Plan Details: Row Plan, Presence of small second yard with one main yard evident. Date Evidence from Farmhouse: 19th Century. Date Evidence from Working Building(s): None.

Position of Farmhouse: Detached, side on to yard. Farmstead Location: Hamlet. Survival: Partial Loss - less than 50% change. Confidence: High.

Other Notes: Large modern sheds on the site of the historic farmstead are either obscuring the historic buildings or may have destroyed them. Two yards of the E have been covered over by large modern shed. Many more large modern sheds to the side. Majority of E remains intact. Med/large pigsty ranges <1>

2 Willaston Road, Moreton Wood, a farmstead first identified and classified by the Historic Farmsteads Characterisation Project, 2008 – 2010, (ESA6427), largely from the digital version of the c.1900 OS large scale mapping.

Monument Types and Dates

FARMSTEAD (Early 19th century to Unknown - 1800 AD?)

Evidence DOCUMENTARY EVIDENCE

Description and Sources

Description

Regular Courtyard L-Plan. Additional Plan Details: None. Date Evidence from Farmhouse: 19th Century. Date Evidence from Working Building(s): None.

Position of Farmhouse: Farmhouse set away from yard. Farmstead Location: Loose farmstead cluster. Survival: Extant - No apparent alteration. Confidence: Low.

Other Notes: Pair of semi detached cottages, each with separate farm buildings. Very small farm. <1>

HER Number	Site Name	Record Type
30845	Undated ditches, Muller Dairy, Market Drayton	Monument

A series of undated ditches and gullies were recorded during archaeological evaluation in 2013. It is suggested that they predated medieval agricultural practice, although no dateable material was recovered from their fills.

Monument Types and Dates

DITCH (Unknown date)	Evidence	EXCAVATED FEATURE
GULLY (Unknown date)	Evidence	EXCAVATED FEATURE

Description and Sources

Description

A series of undated ditches and gullies were recorded during archaeological evaluation in 2013. Located to the north of the railway track recorded in Trench 13, two-three earlier ditches or gullies were excavated. A series of E-W aligned ditches or gullies cut a N-S aligned ditch, which measured over 16.5m in length and 0.6m in width. To the south, a section of sinuous gully was recorded measuring c.22m in length. Given the extremely loose compacted sandy soils that all features were dug into, it is quite possible for all these ditches to have been of close chronological association, as even a large ditch is unlikely to have stayed open for any great period given the rate of collapse observed during the evaluation.->

-> These features do appear to pre-date the tithe map boundaries which resulted from enclosure of an open field system, visible as strip fields further east. The features would not be consistent with medieval ridge and furrow cultivation and are thus likely to be of earlier origin. Further investigation of this zone would identify the heritage significance of the archaeological remains. <1>

A series of features were recorded during archaeological evaluation in 2013, which were interpreted as the cut for a quarry pit and backfilled material. A 19th century date is suggested for this activity.

Monument Types and Dates

QUARRY (19th century - 1800 AD? to 1899 AD?)
Evidence EXCAVATED FEATURE

Description and Sources

Description

A series of features were recorded during archaeological evaluation in 2013, which were interpreted as the cut for a quarry pit and backfilled material. Trench 1 contained a layer of greyish brown sandy clay, which shared similar characteristics with the backfills of other quarry pits on the site. A gently sloped cut, extending to a depth of 1.4m below ground level was recorded in Trench 2, interpreted as the cut for a quarry pit. ->

-> The purpose and focus of this quarrying activity is unclear, but it is possibly for sand or gravel extraction; perhaps the construction of the railway or repairs to the road would have provided a need for such works. A 19th century date is suggested for these features. <1>

A series of features were recorded during archaeological evaluation in 2013, which were interpreted as the cut for a quarry pit and a possible posthole nearby. A 19th century date is suggested for this activity.

Monument Types and Dates

QUARRY (19th century - 1800 AD? to 1899 AD?)
Evidence EXCAVATED FEATURE

Description and Sources

Description

A series of features were recorded during archaeological evaluation in 2013, which were interpreted as the cut for a quarry pit and a possibly related posthole. A 0.60m deep cut was recorded in Trench 7, backfilled with a firmly compacted pinkish brown clay, which contained a fragment of post-medieval pottery. A shallow posthole was recorded to the N. ->

-> The purpose and focus of this quarrying activity is unclear, but it is possibly for sand or gravel extraction; perhaps the construction of the railway or repairs to the road would have provided a need for such works. A 19th century date is suggested for these features. <1>

HER Number 30847

Site Name 19th century boundary ditch, Muller Dairy, Market Drayton

HER Number	Site Name	Record Type
30847	19th century boundary ditch, Muller Dairy, Market Drayton	Monument

A section of ditch was recorded in an archaeological evaluation undertaken in 2013. This ditch is interpreted as a wide boundary ditch, shown on the 1838 tithe map.

Monument Types and Dates

FIELD BOUNDARY (19th century - 1800 AD to 1899 AD)

Evidence	DOCUMENTARY EVIDENCE
Evidence	EXCAVATED FEATURE

Description and Sources

Description

A section of field boundary was recorded during an archaeological evaluation in 2013 on the site of the Muller Dairy. It measured 3.10m wide and 0.75m deep. Although this seems rather wide for a field boundary, it does appear to represent a feature identified on both the tithe map and 1st edition Ordnance Survey map. However, given the loosely compacted nature of the subsoil here, it is unsurprising that the ditch was excavated wider than usual to prevent collapse. This field division, and strip fields to the east shown on the tithe map might have been relict medieval sellions. <1>

HER Number 32059 **Site Name** 19th century cattle byre, W of Longford Grange, Longford, Moreton Say

HER Number	Site Name	Record Type
32059	19th century cattle byre, W of Longford Grange, Longford, Moreton Say	Monument

A brick-built agricultural building, probably a cattle byre.

Monument Types and Dates

COW HOUSE (19th century - 1800 AD to 1899 AD)
Evidence EXTANT BUILDING

Description and Sources

Description

A brick-built agricultural range; clearly built in two phases, with the western section being built first - though there was probably only a short gap in between. The western section was probably built in the late-19th century - perhaps in the 1880s - and was presumably a cattle byre of some kind; it seems too low to have been used for stabling. Its original historical context has been considerably eroded by the removal of the yards associated with it and the eastern section, in particular, has been significantly altered since it was first built. It is to be demolished as part of proposed development. <1>

HER Number	Site Name	Record Type
32091	Site of Wesleyan Chapel, Tern Hill	Monument

The site of a Wesleyan Chapel, built in 1843, ceased to be used as a Methodist church in 1907 and subsequently demolished.

Monument Types and Dates

WESLEYAN METHODIST CHAPEL (Mid 19th century to Early 20th century (pre-war) - 1843 AD to 1907 AD)

Evidence DOCUMENTARY EVIDENCE

HOUSE (Early 20th century (pre-war) to 20th century (post-war) - 1907 AD to 1980 AD?)

Evidence DEMOLISHED BUILDING

Description and Sources

Description

Wesleyan chapel, built 1843. Ceased to be used as a methodist church in 1907 and converted to a house. It is not clear whether a previous cottage was demolished or adapted to form the chapel. Photographed in 1977 by the Wesleyan Historical Society. <1><2>

No building evident on this site so demolished sometime between 1977 and present. <3>

Replaced by a chapel c.70m to the NW (see PRN 32092). <4>

A Royal Observer Corps monitoring post that was active between the dates April 1965 and September 1991.

Monument Types and Dates

ROYAL OBSERVER CORPS MONITORING POST (20th century (post-war) - 1965 AD to 1991 AD)
Evidence DOCUMENTARY EVIDENCE

Description and Sources

Description

In the north west corner of a rectangular compound on the south side of a minor road. All surface features remain intact with the green paint flaking badly. The louvres on the ventilation shaft have slipped down and the step is broken. A metal dome on the ventilation shaft indicates this was a master post. One disused telegraph pole stands nearby. <1>

HER Number 34129 **Site Name** Curvilinear enclosure of probable Iron Age/Roman date and possible pit alignment, c.190m SE of Longslow House Farm,

HER Number	Site Name	Record Type
34129	Curvilinear enclosure of probable Iron Age/Roman date and possible pit alignment, c.190m SE of Longslow House Farm, Longslow, Market Drayton	Monument

A curvilinear enclosure of probable Iron Age/Roman date is visible as cropmarks on 2011 air photographs. The south-west of the enclosure appears to have been truncated by a modern road. A pit alignment, possibly associated, extends north-east to south-west, adjacent to the enclosure, for over 500m.

Monument Types and Dates

PIT ALIGNMENT? (Prehistoric - 500000 BC to 43 AD)

Evidence CROPMARK

CURVILINEAR ENCLOSURE (Early Iron Age to Roman - 800 BC? to 410 AD?)

Evidence CROPMARK

Description and Sources

Description

A curvilinear enclosure of probable Iron Age/Roman date is visible as cropmarks on 2011 aerial reconnaissance photographs, centred at SJ 6600 3469. The south-west of the enclosure appears to have been truncated by a modern road. A pit alignment, possibly associated, extends north-east to south-west, adjacent to the enclosure, for over 500m. Numerous additional linear ditches in the area have been interpreted as recent drains. <1>

This is represented on <1> as a point, and the original source has not been seen by the HER. The enclosure can be seen on the 1983 Cartographic Services AP (<2a>), but the pit alignment is not visible so has not been plotted on the HER's GIS. <2>

Clearly visible on Google Earth imagery dated 27/06/2018, captured during drought conditions. In addition, the pit alignment running to the W of the enclosure is also clearly visible. GIS adjusted on this basis. <3>
